

NOTES:

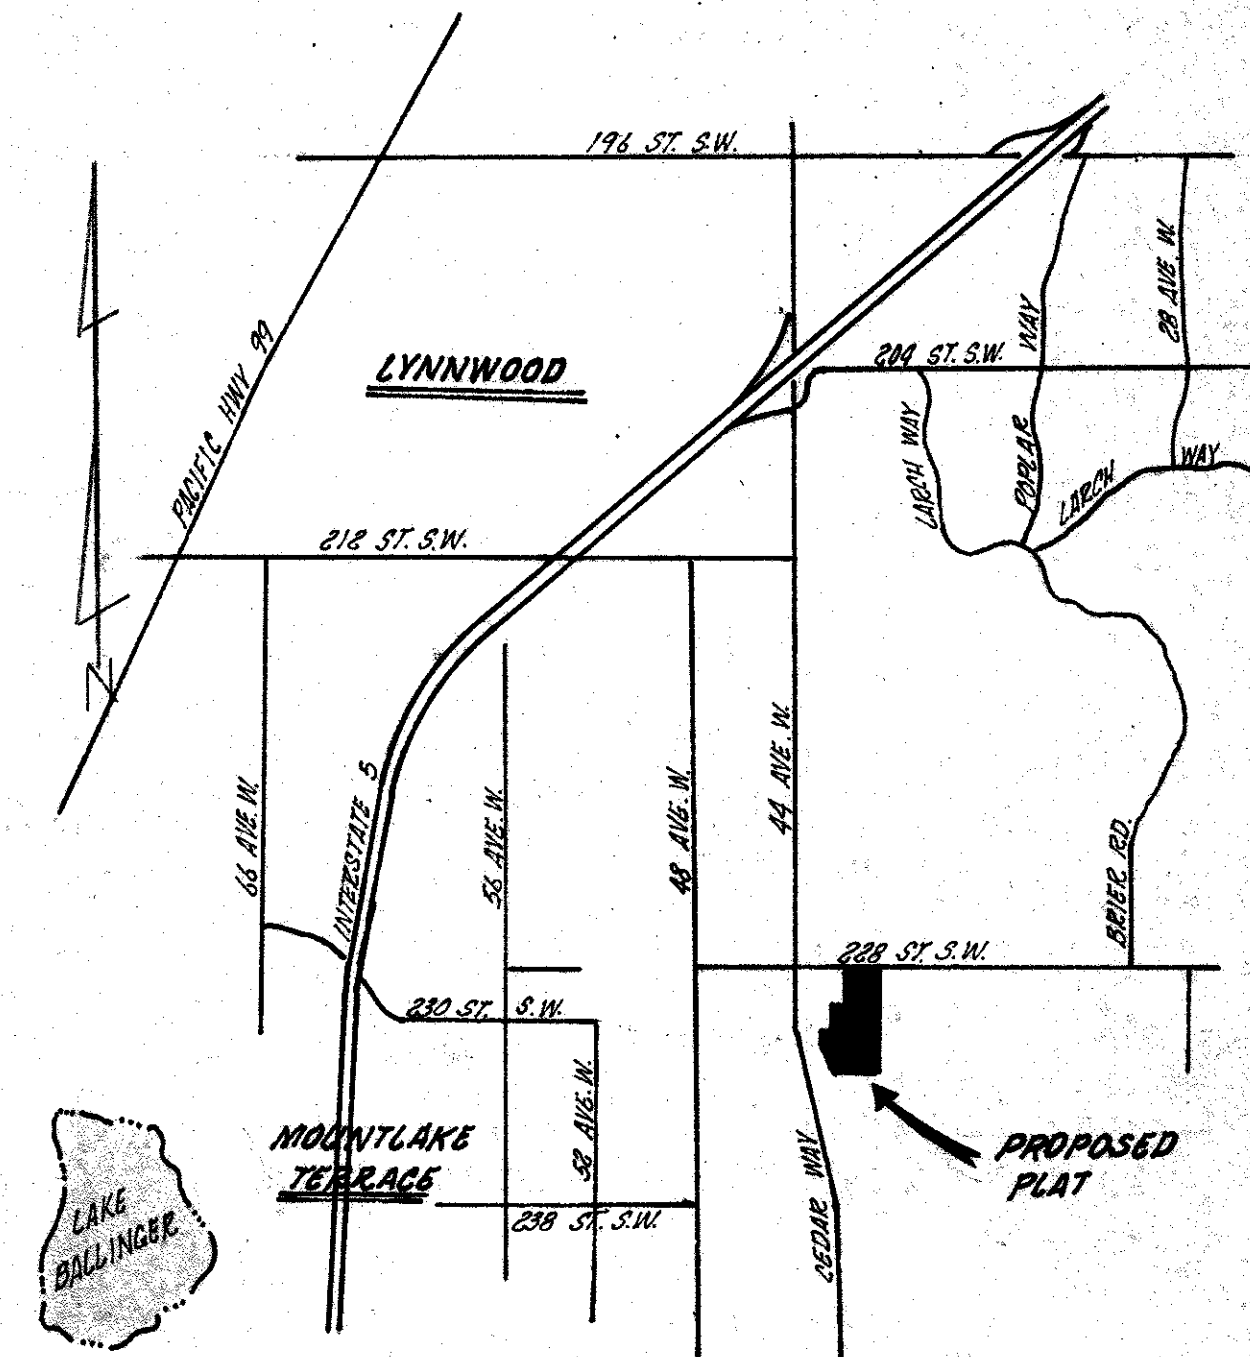

GENERAL

1. STANDARD SPECIFICATIONS - Standard Specifications for this Project are contained in a bound volume entitled "Standard Specifications for Municipal Public Works Construction" prepared by the Washington State Chapter of the American Public Works Association, 1975 Edition.
2. CONSTRUCTION - All construction shall conform to the requirements of the Standard Specifications and the City of Mountlake Terrace. Where conflicts occur, the more stringent shall apply.
3. INSPECTION - The Contractor shall notify the appropriate departments for any required inspections prior to putting any utilities into service.
4. EXISTING UTILITIES - It shall be the Contractors responsibility to locate any existing utilities that may conflict with his operations. Exact location of existing utilities must be verified by the Contractor.
5. PERMITS - It shall be the Contractors responsibility to be sure all necessary permits have been obtained before starting construction.

Sewer

PIPE- All sewer pipe shall be unplasticized polyvinyl chloride (PVC) Plastic Gravity Sewer Pipe with integral wall bell and spigot joints for the conveyance of domestic sewage. The pipe and fittings shall meet extra strength minimum of SDR=35 of the requirements of ASTM Specification D 3034-73 as manufactured by Johns-Manville or approved equal. The pipe shall be installed in accordance with the City of Mountlake Terrace Sewer Code.

FITTINGS All fittings and accessories shall be as manufactured and furnished by the pipe supplier or approved equal and have bell and/or spigot configurations identical to that of the pipe.
